

Department of Radiology

Spinal Pain Intervention

Turn Around Time (TAT)

Number of Spinal Pain Intervention in Department of Radiology

The total number of spinal pain interventions performed by the Department of Radiology

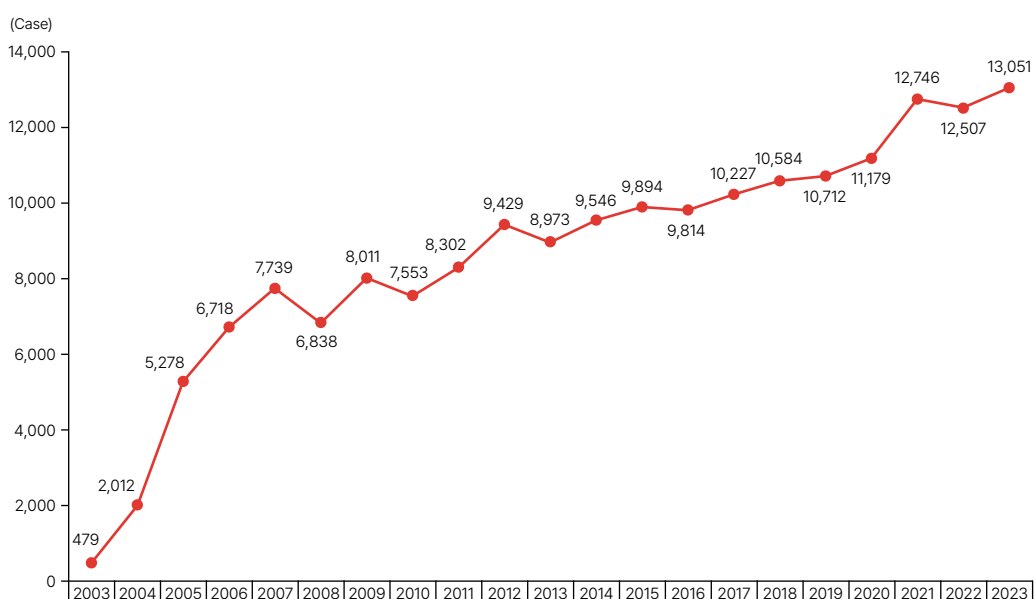

Definitions

- **Number of spinal pain interventions:** The total number of spinal pain interventions performed for outpatients in Department of Radiology or inpatients at another department upon request.

Result

May 1, 2003 - December 31, 2023

Interpretation

- The number of spinal pain interventions in Department of Radiology during the period between 2003 and 2023 shows an annual $\geq 10,000$ cases at the current state.

Improvement

- Regular meetings for discussing more efficient management of the angiography room regarding spinal pain intervention.
- Close cooperation with the Spine Center regarding outpatient management.
